# SUBJECT INDEX.

[References to the papers read before the Institute are indicated by the word *Paper* following the page number. The letter *P.* denotes a reference in Section I. of the Journal which contains the reports of the proceedings of meetings, the papers read, and the discussions thereon. The letter *A.* denotes a reference to the section dealing with abstracts.

*Indexing of Alloy Steels and Other Alloys.* In the indexing of alloy steels, carbon and iron are ignored and the alloying elements contained in the steel are arranged in alphabetical order; for example, all references to nickel-chromium-molybdenum steel will be found under the heading chromium-molybdenum-nickel steel. In the indexing of other alloys, carbon and iron, when present, are included in the title; iron, when present, is always mentioned first and the other elements follow in alphabetical order, carbon being in all cases mentioned last. Examples: "Iron-silicon-carbon alloys" and "iron-chromium-nickel-carbon alloys."]

AIB Sintering Plant, 43*A*., 170*A*.
Abnormality, steel, bibliography, 70*A*.
Abrasion. *See* Wear.
Abrasive Cleaning, bibliography, 101*A*.
Abrasives, properties, 2*A*.
Accidents, in foundries, 223*A*.
Acid Open-Hearth Practice, 50*A*.
Acid Slag, desulphurisation of pig iron, 175*A*.
Africa:
  iron ore deposits, 208*A*.
  manganese deposits, 208*A*.
Ageing, steel, 153*P*.
Agnew Sintering Machine, 43*A*.
Aircraft Engines:
  heat treatment, 184*A*.
  use of cast-iron piston rings, 37*A*.
  use of molybdenum-nickel-tungsten steel, 248*A*.
Aircraft Parts:
  stamping, 93*A*.
  use of stainless steel wire, 117*A*.
Aircraft Steel:
  notched-bar tensile strength, 196*A*.
  welding, 149*A*.
Alkazid Process for sulphur recovery from gas, 45*A*.
Alloy Systems, binary, 207*A*.
Alloys:
  aluminium, properties compared with steel, 239*A*.
  copper, molten, action on chromium-nickel steel, 246*A*.
  development, 155*A*.
Alloys (*contd.*)—
  electrodeposition, 31*A*.
  iron-aluminium-nickel, heat treatment in magnetic field, 244*A*.
  iron-aluminium-nickel, sintered, use for magnets, 219*A*.
  iron-aluminium-nickel, transformations, 158*A*.
  iron-carbon, martensite transformation, 125*A*.
  iron-carbon, pure, structure, 39*A*., 121*A*.
  iron-carbon, specific heat, 200*A*.
  iron-carbon, thermal expansion, 153*A*.
  iron-cobalt-nickel, expansion coefficient, 34*A*.
  iron-cobalt-tungsten, hardening characteristics, 110*A*.
  iron-manganese, properties, 32*A*.
  iron-nickel, transformations, 39*A*.
  iron-silicon, magnetic properties, 65*A*.
  iron-tin, rate of formation in tinning, 104*A*.
  iron-tungsten, precipitation hardening, 160*A*.
  use for hard facings, 156*A*.
  weldability, 149*A*.
Alumina, behaviour in slags, 7*A*. *See also* Refractory Materials.
Alumina-Silica Refractories. *See* Refractory Materials.
Aluminium:
  effect in steel, graphitisation, 119*A*.
  molten, action on heat-resistant steel, 245*A*.

ALUMINIUM (*contd.*)—
tensile tests at high temperatures, 62*A*.
ALUMINIUM ALLOYS, properties compared with steel, 239*A*.
ALUMINIUM - CHROMIUM - SILICON STEEL, action of chromium dioxide, 245*A*.
ALUMINIUM COATINGS, sparking, 102*A*.
AMMONIA LIQUORS, electrolysis, 6*A*.
AMMONIUM SULPHATE, production, 215*A*.
AMSLER-MORTON SOAKING PIT, 14*A*.
ANALYSIS, 74*A*., 163*A*., 251*A*.
coal, 78*A*.
colorimetric, 252*A*.
ferro-columbium, 166*A*.
gas, use of silica gel catalyst, 79*A*.
iron, oxidation of graphite, 74*A*.
iron and steel, organic reagents, 74*A*.
open-hearth slag, 91*A*.
spectrum, alloys, 78*A*.
spectrum, control of arc, 167*A*.
spectrum, corrosion products, 251*A*
spectrum, determination of tellurium in iron, 77*A*.
spectrum, inclusions, 252*A*.
spectrum, Lundegärdh method, 77*A*, 254*A*.
spectrum, steel, 77*A*.
use of drop reactions, 253*A*.
ANDALUSITE. *See* Refractory Materials.
ANNEALING :
bright, sheets, 21*A*.
bright, strip, 186*A*.
chromium die steel, 23*A*.
chromium-nickel steel forgings, 146*A*.
rods for cold-heading, 22*A*.
ANNEALING FURNACES :
design of covers, 235*A*.
for seamless tubes, 99*A*.
for strip, 21*A*.
for wire and strip, 22*A*.
ANNEALING TIME, effect on strip, 186*A*.
ANNUAL MEETING, proceedings, 1*P*.
ARMOUR PLATE, rolling mill, 232*A*.
ARSENIC, removal from iron ore, 169*A*.
ASSOCIATES, election, 6*P*.
ATMOSPHERES, controlled, 58*A*., 96*A*., 143*A*., 185*A*., 186*A*.
AUSTENITE :
decomposition in steel, 71*A*.
decomposition in steel, effect of carbon and cooling rate, 121*A*.
AUSTENITE (*contd.*)—
decomposition, velocity, 122*A*.
formation during cold-working, 153*P*.
formation in steel, effect of initial structure, 121*A*.
positions of carbon atoms, 111 *Paper*.
transformation, determination by electrical resistance method, 122*A*.
transformation in high-speed steel at low temperatures, 122*A*.
AUSTENITIC STEEL :
creep, 114*A*.
intergranular corrosion, 73*A*.
AUSTRALIA, manufacture of alloy steel, 53*A*.
AUSTRALIAN IRON AND STEEL, LTD., electric furnace plant, 224*A*.
AUTOMOBILE CASTINGS, production, 221*A*.
AUTOMOBILE ENGINES, production, 48*A*.
AUTOMOBILE PARTS :
forging, 139*A*.
stamping, 139*A*.
AXLES :
fatigue strength, effect of flame-hardening, 151*A*.
railway, specification, British, 249*A*.

BAINITE, tensile properties, 108*A*.
BALDWIN-OMES PROCESS, for forging shells, 139*A*.
BARS :
cooling times, 234*A*.
drawing, swelling of material, 231*A*.
hardening furnaces, 23*A*.
rolling, 232*A*.
rolling, formation of folding cracks, 64*A*., 184*A*.
BASIC BESSEMER PROCESS, 225*A*.
BASIC BESSEMER STEEL :
properties, 118*A*.
use for rivets, 69*A*., 203*A*.
BASIC ELECTRIC FURNACE PRACTICE, 51*A*.
BASIC OPEN-HEARTH FURNACES, roofs, durability, 2*A*.
BASIC OPEN-HEARTH PRACTICE, oxidation of chromium, 50*A*.
BASIC OPEN-HEARTH PROCESS, chemistry, 227*A*.
BASIC OPEN-HEARTH SLAG, composition, 53*A*.
BAUXITE. *See* Refractory Materials.

BAUXITE DEPOSITS, United States, 208*A*.
BEAMS, rolling, 57*A*.
BEARING METAL, use of malleable cast iron, 202*A*.
BEARINGS :
  anti-friction, 183*A*.
  Lignostone, 140*A*.
  rolling-mill, 140*A*., 183*A*., 184*A*.
  synthetic resin, 17*A*.
BEND FATIGUE STRENGTH :
  chromium-molybdenum steel, 110*A*.
  chromium-nickel steel, 110*A*.
  crankshafts, 117*A*.
  nickel steel, 110*A*.
BENTONITE, use as binder for synthetic moulding sand, 170*A*.
BENTONITE DEPOSITS, New Zealand, 169*A*.
BESSEMER CONVERTERS :
  blast supply, 11*A*.
  increase of production, 225*A*.
  use of dry-air blast, 11*A*.
BESSEMER GOLD MEDAL, awarded to E. G. Grace, 2*P*.
BESSEMER PROCESS :
  basic, 225*A*.
  reactions, 224*A*.
  teeming temperatures, effect on cost of conditioning billets, 12*A*.
  teeming temperatures, effect on nitrogen in steel, 12*A*.
BESSEMER STEEL :
  basic, properties, 118*A*.
  basic, use for rivets, 69*A*., 203*A*.
  compared with open-hearth steel, 12*A*.
BETHANISING PROCESS, 191*A*.
BETHLEHEM STEEL CO :
  pipe mills, 18*A*.
  rod mills, 17*A*.
BIBLIOGRAPHY, 80*A*., 167*A*., 256*A*.
  abrasive cleaning, 101*A*.
  effect of grain size on magnetic properties of steel, 70*A*.
  electrodeposition of chromium, 30*A*.
  electrogalvanising, 31*A*.
  grain size in steel, 70*A*.
  physical chemistry of open-hearth process, 51*A*.
BILLET FURNACES, 229*A*.
BILLETS :
  drawing, 139*A*.
  scarfing, 29*A*.
  surface quality, effect of condition of ingot moulds, 54*A*.
BINARY SYSTEMS, 207*A*.
BITUMINOUS COATINGS, 106*A*.
BLAST :
  control in cupolas, 176*A*., 220*A*.
  dry, use in Bessemer converters, 11*A*.
  drying, 46*A*., 134*A*., 175*A*.
  hot, use in cupolas, 48*A*.
  supply to Bessemer converters, 11*A*.
BLAST-FURNACE GAS :
  cleaning, 216*A*.
  cleaning, electric methods, 216*A*., 217*A*.
  use in reheating furnaces, 14*A*.
  uses and distribution, 217*A*.
BLAST-FURNACE LININGS :
  durability, effect of working conditions, 211*A*.
  temperature gradients, 1*A*., 212*A*.
  use of carbon blocks, 44*A*.
BLAST-FURANCE PLANTS, scale cars, 84*A*.
BLAST-FURNACE PRACTICE :
  effect of coke properties, 5*A*., 83*A*.
  statistical investigations, 5*A*.
BLAST-FURNACES :
  blast, drying, 46*A*, 134*A*, 175*A*.
  blowers, 46*A*.
  charges, effect of size of material, 47*A*.
  charges, physical behaviour, 47*A*.
  cooling coils, cleaning, 218*A*.
  effect of blast volume, pressure and temperature, 175*A*.
  high-blast temperatures, 46*A*.
  increase of capacity, 218*A*.
  refractory materials, 170*A*.
  use of iron-impregnated coke, 47*A*.
BLOOMING MILLS, *see* Cogging Mills.
BLOWERS :
  for blast-furnaces, 46*A*.
  gas-engine-driven, 4*A*.
BLOWHOLES, in castings, 222*A*.
BOLTS, fatigue strength, 242 *A*.
BOMB CASES, production, 223*A*.
BOOK NOTICES :
  American Institute of Mining and Metallurgical Engineers, "Transactions, vol. 143," 40*A*.
  Association of Iron and Steel Engineers, "The Modern Strip Mill," 254*A*.
  Association of Polish Engineers, "Anglo-Polish Translation of Workshop Terms," 255*A*.
  Chalmers, B., and A. G. Quarrell, "The Physical Examination of Metals," vol. II, 128*A*.

BOOK NOTICES (*contd.*)—
Greenwood, J. N., "Glossary of Metallographic Terms," 129*A*.
Hume-Rothery, "Researches on the Structure of Alloys," 129*A*.
Institute of Petroleum, "Annual Review of Petroleum Technology, vol. 6," 79*A*.
Larkin, E. J., "Works Organisation and Management," 130*A*.
BORON, diffusion in steel, effect of carbon, 234*A*.
BRASS, welding to steel, 188*A*.
BRASS COATINGS, 190*A*.
BRAZIL, steel plant, 224*A*.
BRAZING FURNACES, 188*A*.
electric, 143*A*.
BREALY MOLYBDENUM HIGH-SPEED STEEL, 185*A*.
BRINELL HARDNESS, cast iron, spread of results, 111*A*.
BRIQUETTING :
coal, 215*A*.
swarf, 88*A*.
BRITISH EMPIRE, iron industries, 11*A*.
BRITISH REFRACTORIES RESEARCH ASSOCIATION, work of, 212*A*.
BRITTLENESS :
chromium-nickel steel, 246*A*.
hot, molybdenum steel, 113*A*.
BROKEN HILL PROPRIETORY CO., open-hearth furnaces, 138*A*.
BUDD PROCESS of induction hardening, 24*A*.
BUDERUS'SCHE EISENWERKE :
gas-cleaning plant, 216*A*.
iron ore mixing, 131*A*.
BUICK MOTOR DIVISION, cupola practice, 221*A*.
BUNDY TUBES, manufacture, 58*A*.

CADMIUM, electrodeposition, 31*A*.
CADMIUM COATINGS, 190*A*.
CALCIUM PHOSPHATES, behaviour in steel melts, 179*A*.
CALORIFIC VALUE, coke-oven gas, determination, 83*A*.
CAPACITY, increase in iron and steel works, 55*A*.
CARBIDE, cemented, manufacture and properties, 28*A*.
CARBIDE DIES, 183*A*.
CARBIDE SPHEROIDISATION, effect on molybdenum steel, creep, 244*A*.
CARBIDE TOOLS :
grinding, 28*A*.
tungsten, production, 157*A*.
CARBON :
determination in coal, 78*A*.
determination in steel, 164*A*.
effect in chromium-nickel steel, 116*A*.
effect in steel, austenite decomposition, 121*A*.
effect in steel, diffusion of elements, 234*A*.
effect in steel, strength at high temperatures, 51*P*.
in tool steel, effect of heating in oxidising atmospheres, 97*A*.
preparation and properties, 44*A*.
use for ingot moulds, 44*A*.
CARBON ATOMS, positions in austenite, 111 *Paper*.
CARBON BLOCKS. *See* Refractory Materials.
CARBON MONOXIDE, determination in hydrogen-bearing gases, 164*A*.
CARBON-OXYGEN EQUILIBRIUM in liquid iron, 125*A*.
CARBON STEEL :
arc welding, 24*A*.
corrosion by steam, 160*A*.
creep, structural changes, 51*P*.
effect of grain size and heating, 237*A*.
structure, 71*A*.
wear, effect of oxygen, 112*A*.
CARBONISATION :
coal, electrical method, 174*A*.
low-temperature, thermal pretreatment of coal, 134*A*.
CARBONYL IRON, thermal expansion, 153*A*.
CARBURISING :
determination of degree, 97*A*.
Diesel engine parts, 98*A*.
gaseous, 20*A*., 60*A*., 98*A*., 143*A*.
steel, effect on characteristics of zinc coatings, 103*A*.
use of salt baths, 145*A*.
CARBURISING BOXES, life, 60*A*.
CARBURISING FURNACES, electric, 143*A*.
CARNEGIE-ILLINOIS STEEL CORPORATION :
power plant, 45*A*.
strip mill, 58*A*.
CARNEGIE RESEARCH GRANT awarded to M. Balicki, 7*P*.
CASE-HARDENED STEEL, effect of intermediate cooling, 97*A*.
CASE-HARDENING, 20*A*., 60*A*.
CASE-HARDENING FURNACES, salt bath, 143*A*.
CASE-HARDENING STEEL, molybdenum-free, properties, 201*A*.

CAST IRON :
alloy, properties, 68*A*.
Chromidium, 68*A*.
chromium-molybdenum, flame-hardening, 60*A*.
control of matrix structure, 205*A*.
cooling phenomena, 205*A*.
Cromol, 68*A*.
determination of chromium, photo-colorimetric method, 253*A*.
determination of vanadium, photo-colorimetric method, 166*A*.
effect of cerium, 115*A*.
effect of corrosion, strength properties, 198*A*.
effect of elements, 156*A*., 241*A*.
effect of hydrogen, 68*A*.
effect of misch metal, 69*A*.
effect of pouring temperature, 108*A*.
fatigue strength, 65*A*., 199*A*., 241*A*.
grades available in industry, 250*A*.
graphite distribution, 205*A*.
graphitisation, 86*A*.
graphitisation, velocity, 122*A*.
hardness, spread of results, 111*A*.
heat treatment, 94*A*.
machinability, 244*A*.
malleable. *See* Malleable Cast Iron.
manufacture in electric furnaces, 176*A*.
manufacture in high-frequency furnaces, 48*A*.
molybdenum-nickel, acicular structure, 119*A*.
Monikron, 68*A*.
notch sensitivity, 241*A*.
oxygen content, 201*A*.
plastic deformation, 241*A*.
production, American developments, 84*A*.
properties, effect of melting furnace used, 136*A*.
properties at high temperatures, 156*A*.
tensile tests, specimen holder, 107*A*.
tests, standardisation, 107*A*.
welding, 62*A*., 99*A*., 187*A*.
CAST STEEL :
fluidity, 10*A*., 223*A*.
low-alloy, development, 220*A*.
welding, 100*A*.
CASTING :
centrifugal, 10*A*.
centrifugal, gear blanks, 220*A*.
manhole rings, 9*A*.
shells, 136*A*.
CASTING MACHINE, Wagner, 9*A*.
CASTING PITS, refractory materials, 132*A*.
CASTINGS :
alloy steel, properties, 248*A*.
automobile, production, 221*A*.
blowholes, 222*A*.
chilled, addition of tellurium, 220*A*.
cleaning, 10*A*., 48*A*.
composite, production, 177*A*.
dimensional changes, 89*A*.
gating, 88*A*., 222*A*.
iron, design, 85*A*.
iron, inclusions, 222*A*.
machine tool, minimum wall thickness, 151*A*.
machine tool, moulding, 223*A*.
machine tool, production, 137*A*.
malleable iron, design, 86*A*.
malleable iron, moulding, 222*A*.
pressure, 48*A*.
railway, specifications, British, 249*A*.
small, patterns for, 88*A*.
steel, heat treatment, 45*A*.
steel, impact strength at low temperatures, 108*A*.
steel, low-alloy, properties, 157*A*.
steel, moulding, 137*A*.
steel, moulding sands for, 86*A*.
steel, pin-hole formation, 89*A*.
steel, tearing, effect of mould friction, 101 *Paper*.
wall-thickness, determination, 37*A*.
weldings, 27*A*.
CATHODIC PROTECTION :
gas well casing, 126*A*.
tanks, 161*A*.
CEMENT, slag, specification, British, 47*A*.
CEMENTATION :
steel with chromium, 142*A*.
steel with silicon, 59*A*.
CEMENTITE, lattice spacings and structure, 143 *Paper*.
CERIUM, effect in cast iron, 69*A*., 115*A*.
CHAINS, defects, detection by Sperry method, 66*A*.
CHANNELS, rolling, 57*A*.
CHAPMAN-STEIN SOAKING PIT, 14*A*.
CHILLED CASTINGS, addition of tellurium, 220*A*.
CHILLED ROLLS, properties, 202*A*.
CHLORIDES, molten, action on heat-resistant steel, 245*A*.
CHLORINE, determination in coal, 78*A*.
CHROM-X, preparation, 12*A*.
CHROMANSIL STEEL, use for gas cylinders, 202*A*.
CHROME ORE DEPOSITS, Philippines, 169*A*.

CHROMIDIUM CAST IRON, 68*A*.
CHROMITE. *See* Refractory Materials.
CHROMIUM :
cementation of steel, 142*A*.
detection in minerals, 74*A*.
determination in cast iron, photo-colorimetric method, 253*A*.
diffusion in steel, effect of carbon, 234*A*.
effect in cast iron, 156*A*., 241*A*.
effect in steel, 36*A*.
effect in steel, graphitisation, 199*A*.
effect in steel, transformations, 120*A*.
electrodeposition, 30*A*.
electrodeposition, bibliography, 30*A*.
electrodeposition on cylinder bores, 101*A*.
electrodeposition in glassware moulds, 102*A*.
oxidation in basic open-hearth practice, 50*A*.
CHROMIUM COATINGS, 190*A*.
hard, 30*A*., 102*A*., 190*A*.
CHROMIUM-COBALT STEEL, creep, 66*A*.
CHROMIUM DIE STEEL, annealing, 23*A*.
CHROMIUM IRON, weldability, 61*A*.
CHROMIUM - MANGANESE - MOLYBDENUM STEEL :
heat treatment, volume changes, 95*A*.
properties, 247*A*.
CHROMIUM - MANGANESE - NICKEL STEEL, effect of cold deformation, 63*A*.
CHROMIUM - MANGANESE - SILICON STEEL :
action of sulphur dioxide, 245*A*.
hot-working properties, effect of silicon, 245*A*.
CHROMIUM-MANGANESE STEEL :
creep, 66*A*.
effect of nitrogen, 246*A*.
CHROMIUM-MOLYBDENUM CAST IRON, flame-hardening, 60*A*.
CHROMIUM-MOLYBDENUM HIGH-SPEED STEEL :
hardness, 69*A*.
thermal conductivity, 69*A*.
CHROMIUM - MOLYBDENUM - NICKEL STEEL :
properties, 37*A*.
use for gas cylinders, 201*A*.
CHROMIUM - MOLYBDENUM - NICKEL STEEL FORGINGS, quenching cracks, 24*A*.
CHROMIUM - MOLYBDENUM - NICKEL-VANADIUM STEEL, effect of segregation and forging, 248*A*.
CHROMIUM-MOLYBDENUM STEEL :
bend fatigue strength, 110*A*.
corrosion by steam, 160*A*.
fatigue strength, effect of elastic limit, 199*A*.
fatigue strength at low temperatures, 199*A*.
heat treatment, volume changes, 95*A*.
welded, crack sensitivity, 61*A*.
CHROMIUM-MOLYBDENUM STEEL SHEETS, arc welding, 26*A*.
CHROMIUM-MOLYBDENUM STEEL TUBES :
arc welding, 26*A*.
residual stresses, 198*A*.
CHROMIUM-NICKEL PIG IRON, production, 134*A*.
CHROMIUM-NICKEL-SILICON STEEL, properties, 66*A*.
CHROMIUM-NICKEL STEEL :
action of molten copper alloys, 246*A*.
bend fatigue strength, 110*A*.
brittleness, 246*A*.
corrosion, intergranular, 40*A*., 73*A*.
corrosion by steam, 160*A*.
creep, effect of temperature fluctuations, 113*A*.
effect of carbon, 116*A*.
effect of cold deformation, 63*A*.
effect of nitrogen, 114*A*., 116*A*., 155*A*., 246*A*.
electrolytic polishing, 188*A*.
fatigue strength, effect of elastic limit, 199*A*.
hot-working properties, effect of silicon, 113*A*., 245*A*.
machinability, 112*A*.
machining, 28*A*.
resistance to deformation, effect of temperature, 113*A*.
S-curves, 159*A*.
transformations, 159*A*.
weldability, 61*A*.
CHROMIUM-NICKEL STEEL CASTINGS, properties, 248*A*.
CHROMIUM-NICKEL STEEL FORGINGS, annealing, 146*A*.
CHROMIUM-SILICON STEEL, action of sulphur dioxide, 245*A*.
CHROMIUM-SILICON-TUNGSTEN-VANADIUM STEEL, transformations, 206*A*.
CHROMIUM-SILICON-VANADIUM STEEL, transformations, 206*A*.

CHROMIUM STEEL :
action of sulphur dioxide, 245*A*.
corrosion by steam, 160*A*.
effect of nitrogen, 246*A*.
effect of titanium, 36*A*.
heat resistance, effect of silicon, 245*A*.
heat treatment, 96*A*.
heat treatment, volume changes, 95*A*.
nitriding, 185*A*.
pickling cracks, 101*A*.
softening, effect of molybdenum, 113*A*.
wear, effect of oxygen, 112*A*.
weldability, 61*A*.
CHROMIUM STEEL CASTINGS, properties, 248*A*.
CHROMIUM-TUNGSTEN STEEL CASTINGS, properties, 248*A*.
CIBANITE, use for mounting metallographic specimens, 38*A*.
CINEMATOGRAPHY, use for study of transformations in metals, 160*A*.
CLAD METALS, welding, 149*A*., 187*A*.
CLEANING :
abrasive, bibliography, 101*A*.
air supply to mill motors, 56*A*.
blast-furnace gas, 216*A*.
blast-furnace gas, electric methods, 216*A*., 217*A*.
castings, 10*A*., 48*A*.
coal, 83*A*.
coal, separating smalls from slurry, 133*A*.
electrolytic, cold-rolled strip, 29*A*.
gases, Traughber filter, 6*A*.
metals, 28*A*., 100*A*., 188*A*.
metals, use of salt baths, 28*A*.
shells, 101*A*., 189*A*.
COAL :
analysis, 78*A*.
briquetting, 215*A*.
B.Th.U. values, 214*A*.
carbonisation, electrical method, 174*A*.
cleaning, 83*A*.
cleaning, separating smalls from slurry, 133*A*.
coking properties, 5*A*.
determination of sulphur, 167*A*.
evaluation, 215*A*.
German, gasification, 46*A*.
grindability, 215*A*.
Indian, properties, 214*A*.
Kentucky, coking properties, 213*A*.
pulverised, fineness, 215*A*.
sulphur in, effect of heat and pressure, 214*A*.
COAL (*contd.*)—
swelling, 83*A*., 134*A*.
West Virginia, coking properties, 213*A*.
COAL ASH, fusion temperature, determination, 78*A*.
COAL BUNKERS, design, 173*A*.
COAL DEPOSITS :
India, 214*A*.
Japan, 208*A*.
COAL DUST, use in moulding sand, 88*A*.
COATING, metals, 30*A*., 101*A*., 190*A*.
COATINGS :
aluminium, sparking, 102*A*.
bituminous, 106*A*.
brass, 190*A*.
cadmium, 190*A*.
chromium, 190*A*.
chromium, hard, 30*A*., 102*A*., 190*A*.
cobalt, 190*A*.
copper, 190*A*.
electrodeposited, properties, 30*A*.
electrodeposited, thickness determination, 190*A*.
enamel, effect of hydrogen, 35*A*.
enamel, fish-scale formation, 193*A*.
enamel, pin-hole formation, 105*A*.
gold, 190*A*.
nickel, 190*A*.
nickel, rough and porous, 191*A*.
paint, characteristics, 195*A*.
paint, corrosion tests, 127*A*.
phosphate, 193*A*.
protective, effect of silicon aerogel, 106*A*.
silver, 190*A*.
sprayed, 105*A*.
tin, 190*A*.
zinc, 190*A*.
zinc, effect of deformation, grain-size and carburising treatment of steel, 103*A*.
zinc, effect of hydrochloric acid and sodium chloride solution, 191*A*.
zinc, grey, 191*A*.
zinc, repair, 104*A*.
zinc, substitutes for, 192*A*.
COBALT :
detection in minerals, 74*A*.
diffusion in steel, effect of carbon, 234*A*.
electrodeposition, 31*A*.
COBALT COATINGS, 190*A*.
COEFFICIENT OF EXPANSION, iron-cobalt-nickel alloys, 34*A*.
COGGING MILLS, increase of capacity, 57*A*.
COHESIVE STRENGTH, 63*A*.
metals, 239*A*.

Coil Conveyors for strip mills, 140*A*.
Coke :
iron-impregnated, use in blast-furnaces, 47*A*.
determination of phosphorus and sulphur, 79*A*.
fissuring, effect of heating, 174*A*.
properties, 83*A*.
properties, effect on blast-furnace practice, 5*A*., 83*A*.
tests, British standard, 216*A*.
Coke-Oven Gas :
calorific value, determination, 83*A*.
uses and distribution, 217*A*.
Coke-Ovens :
Kuroda, 45*A*.
Ono, 45*A*.
walls, temperature distribution, 174*A*.
Coking Plants, increase in production, 215*A*.
Coking Practice, statistical investigation, 83*A*.
Coking Process, swelling of coal, 83*A*., 134*A*.
Coking Properties, coal, 5*A*., 213*A*.
Cold-Heading Rods, annealing, 22*A*.
Cold-Rolled Strip, electrolytic cleaning, 29*A*.
Cold-Rolling :
strip, 57*A*.
strip, effect of structure, 112*A*.
Cold-Work :
effect on manganese steel, 152*A*.
effect on stainless steel, 63*A*.
effect on steel, 153*P*.
effect on tensile strength, 194*P*.
similarity to quenching, 153*P*.
Columbium :
detection in minerals, 74*A*.
determination in steel, 76*A*., 166*A*.
Combustion, gases, 83*A*.
Commonwealth Steel Co., Ltd. :
manufacture of alloy steel, 53*A*.
rolling-mill plant, 231*A*.
Companhia Siderurgica Belgo-Mineira, steel plant, 224*A*.
Composite Castings, production, 177*A*.
Composition :
effect on die steel, softening, 113*A*.
steel, control, 90*A*.
Compression Tests, alloy steel, 240*A*.
Concentration :
iron ore, 131*A*.
manganese ore, 42*A*.
Conductivity :
thermal, chromium-molybdenum high-speed steel, 69*A*.
thermal, tungsten high-speed steel, 69*A*.
Containers, specification, British, 250*A*.
Control :
cupolas, 85*A*.
temperature in heat-treatment furnaces, 59*A*.
Converters :
Bessemer, blast-supply, 11*A*.
Bessemer, increase of production, 225*A*.
Bessemer, use of dry-air blast, 11*A*.
Conveyors, use in foundries, 49*A*., 89*A*., 223*A*.
Cooling :
controlled, effect on Bessemer rails, 201*A*.
intermediate, effect on case-hardened steel, 97*A*.
Cooling Rate, effect on steel, austenite decomposition, 121*A*.
Cooling Time for bars, 234*A*.
Copper :
determination in steel, photometric method, 252*A*.
effect in cast iron, 156*A*., 241*A*.
effect in steel, graphitisation, 119*A*.
Copper Alloys, molten, action on chromium-nickel steel, 246*A*.
Copper Coatings, 190*A*.
Cores :
drying, 49*A*., 222*A*.
hot strength, 137*A*.
Corronizing Process, 102*A*.
Corrosion :
atmospheric, steel, 72*A*., 162*A*.
control by water treatment, 161*A*., 163*A*.
effect on cast iron, strength properties, 198*A*.
fretting, effect on fatigue strength, 126*A*.
intergranular, austenitic steel, 73*A*.
intergranular, chromium-nickel steel, 40*A*., 73*A*.
intergranular, steel, 127*A*.
nickel steel, effect of stress, 127*A*.
steel by steam, 160*A*.
theory, 126*A*.
Corrosion-Fatigue, propeller shafts, 162*A*.
Corrosion Investigations, planning, 39*A*.
Corrosion Products, spectrum analysis, 251*A*.

CORROSION TESTS, paint coatings, 127*A*.
CORUNDUM. *See* Refractory Materials.
COSTS :
  calculations for drawn wire, 16*A*.
  evaluation in steel plants, 229*A*.
  in foundries, 90*A*.
COUNCIL REPORT, 13*P*.
COUPLING PINS, failure, 198*A*.
CRACK SENSITIVITY :
  welded chromium-molybdenum steel, 61*A*.
  welds, 237*A*.
CRACK STRENGTH :
  static, 63*A*.
  static, metals, 239*A*.
CRACKS :
  folding, formation during rolling of bars, 64*A*., 184*A*.
  hair-line, in steel, effect of hydrogen, 115*A*.
  hair-line, in steel, effect of hydrogen and stresses, 67*A*.
  hardness, in high-speed steel, 236*A*.
  pickling, in stainless steel, 101*A*.
  quenching, in chromium-molybdenum-nickel steel forgings, 24*A*.
  shatter, in rails, 33*A*.
CRANES, design, 13*A*.
CRANKSHAFTS :
  bend and torsional fatigue strength, 117*A*.
  cast iron, properties, 249*A*.
  failure, 117*A*.
  induction hardening, 98*A*.
  tests, 117*A*.
CREEP :
  austenitic, steel, 114*A*.
  chromium-cobalt steel, 66*A*.
  chromium-manganese steel, 66*A*.
  chromium-nickel steel, effect of temperature fluctuations, 113*A*.
  heat-resistant steel, 153*A*.
  molybdenum steel, 35*A*., 245*A*.
  molybdenum steel, effect of carbide spheroidisation, 244*A*.
  molybdenum-vanadium steel, 245*A*
  recovery of steel, 34*A*., 114*A*.
  steel, structural changes, 51*P*.
CREEP TESTS, stepped loading, 66*A*.
CROMOL CAST IRON, 68*A*.
CRUSHING TESTS, refractory materials at high temperatures, 1*A*.
CUPOLA PRACTICE, 8*A*., 85*A*., 221*A*.
CUPOLA SLAG, disposal, 221*A*.
CUPOLAS :
  blast control, 176*A*., 220*A*.
CUPOLAS (*contd*).—
  control, 85*A*.
  small, operation, 8*A*.
  sulphur pick-up, 8*A*.
  use of hot-blast, 48*A*.
  use of scrap, 48*A*.
CUTTING :
  oxy-acetylene, plates, 238*A*.
  oxy-acetylene, steel, 238*A*.
CUTTING OILS, effect of sulphur, 150*A*.
CUYUNA RANGE, concentration of manganese ore, 42*A*.
CYANIDE HARDENING, 145*A*.
CYANIDES, molten, action on heat-resistant steel, 245*A*.
CYLINDER JACKETS, moulding, 49*A*.
CYLINDER LINERS, wear, 65*A*.
CYLINDERS :
  chromium-plated, wear, 101*A*.
  gas, steels for, 201*A*.
  induction hardening, 23*A*.
  marine engine, moulding, 88*A*.

DECARBURISATION :
  determination of degree, 97*A*.
  steel, effect of chromium and molybdenum, 36*A*.
  tool steel, 145*A*.
DEEP DRAWING, steel, 183*A*.
DEEP DRAWING PROPERTIES, steel, 69*A*., 183*A*.
DEEP-DRAWING STEEL, manufacture, 179*A*.
DEEP DRAWING TESTS, steel, 92*A*.
DEEP-DRAWN STEEL, properties, 37*A*.
DEFECTS :
  detection by magnetic means, 33*A*., 70*A*.
  detection by Sperry method, 66*A*.
  detection in sheet and strip, 141*A*.
  in steel, 50*A*.
DEFORMATION :
  cold, effect on stainless steel, 63*A*.
  effect on tensile strength, 197*A*.
  elastic, rolls, 56*A*.
  metals at high temperatures, 51 *Paper*.
  plastic, cast iron, 241*A*.
  resistance of chromium-nickel steel, effect of temperature, 113*A*.
  resistance of structural steel, 92*A*.
  steel, effect on characteristics of zinc coatings, 103*A*.
DESCALING, steel structures, 89*P*., 194*A*.
DESULPHURISATION :
  pig iron, 6*A*., 84*A*.
  pig iron with acid slags, 175*A*.
DIASPORE. *See* Refractory Materials.

DIATOMACEOUS REFRACTORIES. *See* Refractory Materials.
DIE CASTINGS, pressure, 48*A*.
DIE STEEL :
chromium, annealing, 23*A*.
for shell-piercing machines, 15*A*.
heat treatment, volume changes, 95*A*.
softening, effect of composition and heat treatment, 113*A*.
DIE-TYPING METHOD of forging, 15*A*.
DIES :
chromium-molybdenum cast iron, 60*A*.
design, 15*A*.
drawing, carbide, 183*A*.
forging, 55*A*., 93*A*.
DIESEL ENGINE PARTS, carburising, 97*A*., 98*A*.
DIESEL LOCOMOTIVES, use in steel plants, 13*A*.
DIFFUSION :
elements in steel, effect of carbon, 234*A*.
*See also* Cementation.
DILATOMETERS, use for measuring phase changes, 120*A*.
DISTILLATION PLANTS, tar, health conditions, 46*A*.
DOLOMITE. *See* Refractory Materials.
DOLOMITE DEPOSITS, United States, 208*A*.
DRAWING :
bars, swelling of material, 231*A*.
billets, 139*A*.
deep, steel, 183*A*.
tubes, flow of material, 92*A*.
wire, heating-up of metal, 183*A*.
wire, history, 231*A*.
wire, lubrication systems, 140*A*.
DRAWING DIES, carbide, 183*A*.
DRAWING TESTS, deep, steel, 92*A*.
DROP FORGING PLANTS, organisation, 16*A*.
DROP FORGINGS, determination of production time, 182*A*.
DROP REACTIONS, use in analysis, 253*A*.
DROP STAMPING, small parts, 230*A*.
DRUMS, specification, British 250*A*.
DRYING :
blast, 46*A*., 134*A*., 175*A*.
moulds and cores, 49*A*., 222*A*.
DRYING OVEN for ladle stopper rods, 133*A*.
DUPLEX PROCESS, for malleable cast iron, 8*A*.
DZERZHINSKIY WORKS, universal mills, 184*A*.
ELASTIC LIMIT, effect on alloy steel, fatigue strength, 199*A*.
ELASTICITY CONSTANTS, determination by X-rays, 203*A*.
ELASTICITY MODULUS, determination, 32*A*.
ELASTUFF 44 STEEL, properties, 37*A*.
ELECTRIC CURRENTS, use in heat treatment, 23*A*., 98*A*., 143*A*.
ELECTRIC DRIVING, strip mills, 58*A*.
ELECTRIC FURNACE PLANTS, layout, 51*A*.
ELECTRIC FURNACE PRACTICE, 12*A*., 138*A*., 227*A*.
basic, 51*A*.
hydrogen absorption, 92*A*.
ELECTRIC FURNACES :
arc, temperature distribution in steel, 252*P*., 268*P*.
bottoms, use of plastic refractories, 228*A*.
Greaves Etchells, 228*A*.
Héroult, 138 *A*., 224*A*., 228*A*.
high-frequency, manufacture of cast iron, 48*A*.
high-frequency, manufacture of steel, 228*A*.
high-frequency, temperature distribution in steel, 255*P*., 270*P*.
holders for electrodes, 179*A*.
induction, 228*A*.
linings, 91*A*.
manufacture of cast iron, 176*A*.
over-voltages, 52*A*.
power supply, 52*A*.
Rohn, 52*A*.
transformers, voltage control, 52*A*.
types in use in America, 51*A*.
use in foundries, 85*A*.
use of forsterite bricks, 171*A*.
voltage surges, 52*A*.
ELECTRIC IRONS, nickel plating, 102*A*.
ELECTRIC POWER, protection of transmission lines, 137*A*.
ELECTRIC SMELTING, iron ore, 218*A*.
ELECTRICITY, use in coal carbonisation, 174*A*.
ELECTRODEPOSITED COATINGS :
thickness determination, 190*A*.
properties, 30*A*.
ELECTRODEPOSITION :
alloys, 31*A*.
cadmium, 31*A*.
chromium, 30*A*.
chromium, bibliography, 30*A*.
chromium on cylinder bores, 101*A*.
chromium on glassware moulds, 102*A*.
cobalt, 31*A*.
iron, 31*A*.

ELECTRODEPOSITION (*contd*).—
metals, 30*A*.
nickel, 31*A*.
nickel, effect of wetting agents, 190*A*.
nickel on electric irons, 102*A*.
tin, 32*A*., 104*A*., 192*A*.
tin in alkaline baths, 192*A*.
zinc, 31*A*., 32*A*.
ELECTRODES :
carbon, manufacture, 44*A*.
holders for, 179*A*.
welding, steel for, 100*A*.
ELECTROGALVANISING, 31*A*.
bibliography, 31*A*.
wire, Bethanising process, 191*A*.
ELECTROLYSIS, ammonia liquors, 6*A*.
ELECTROLYTES, effect on grinding of metals, 150*A*.
ELECTROLYTIC CLEANING, cold-rolled strip, 29*A*.
ELECTRLOYTIC IRON :
specific heat, 200*A*.
thermal expansion, 153*A*.
ELECTROLYTIC POLISHING, 118*A*.
stainless steel, 188*A*.
stainless steel, Electro-polish method, 100*A*.
ELECTROPLATING, rectifiers for, 30*A*.
ELECTROPLATING SOLUTIONS, filtration, 30*A*.
ELECTRO-POLISH METHOD of polishing stainless steel, 100*A*.
ELEVATORS, use in foundries, 177*A*.
ELONGATION, measurement, 239*A*., 241*A*.
EMBRITTLEMENT :
hydrogen, steel, 155*A*.
steel during galvanising, 192*A*.
EMMONS MOLYBDENUM HIGH-SPEED STEEL, 185*A*.
ENAMEL COATINGS :
effect of hydrogen, 35*A*.
fish-scale formation, 193*A*.
pin-hole formation, 105*A*.
ENGINES :
aircraft, heat treatment, 184*A*.
aircraft, use of cast-iron piston rings, 37*A*.
aircraft, use of nickel-molybdenum-tungsten steel, 248*A*.
automobile, production, 48*A*.
combustion, use of heat-resistant materials, 246*A*.
gas, for driving blowers, 4*A*.
gas, increase of efficiency, 4*A*.
steam, for driving rolling mills, 4*A*.
EQUILIBRIUM DIAGRAMS, application to manufacture of refractories, 1*A*.
ETCHING, heat-, steel, 118*A*.
EXPANSION :
alumina refractories, 43*A*.
thermal, carbonyl iron, 153*A*.
thermal, electrolytic iron, 153*A*
thermal, iron-carbon alloys, 153*A*.
thermal, non-ferrous metals, 153*A*.
EXPANSION, COEFFICIENT, iron-cobalt-nickel alloys, 34*A*.
EXTENSOMETER for measuring magnetostriction, 66*A*.

FAILURE :
coupling pins, 198*A*.
crankshafts, 117*A*.
metals under combined stresses, 198*A*.
railway material, 33*A*.
FATIGUE :
corrosion, propeller shafts, 162*A*.
determination by X-ray examination of surface stresses, 242*A*.
FATIGUE STRENGTH :
alloy steel, importance of elastic limit, 199*A*.
axles, effect of flame-hardening, 151*A*.
bend, chromium-molybdenum steel, 110*A*.
bend, chromium-nickel steel, 110*A*.
bend, crank shafts, 117*A*.
bend, nickel steel, 110*A*.
bolts and studs, 242*A*.
cast iron, 65*A*., 199*A*., 241*A*.
effect on fretting corrosion, 126*A*.
malleable cast iron, 65*A*., 199*A*.
metals, 241*A*.
steel, effect of clamping, 152*A*.
steel at low temperatures, 199*A*.
theory, 109*A*.
torsional, crank shafts, 117*A*.
FATIGUE TESTING MACHINES, tensile, for wire, 241*A*.
FATIGUE TESTS, interpretation of results, 65*A*.
FEEDER HEADS for castings, 177*A*.
FERRO-ALLOYS, determination of niobium and tantalum, 76*A*., 166*A*.
FERRO-COLUMBIUM, analysis, 166*A*.
FERRO-MANGANESE, production, 219*A*
FERRO-NIOBIUM. *See* Ferro-Columbium.
FERRO-TUNGSTEN, determination of oxygen, effect of vaporisation of iron, 75*A*., 164*A*.
FERROUS OXIDE :
behaviour in slags, 7*A*.
determination in open-hearth slags, use of fluorspar, 167*A*.

FERROX PROCESS for sulphur recovery from gas, 45*A*.
FILMS, surface, effect of wear, 200*A*.
FILTERING, electroplating solutions, 30*A*.
FISH EYE FRACTURE, welds, 187*A*.
FISH-SCALES, formation on enamel coatings, 193*A*.
FISSURES, transverse, in rails, 33*A*.
FLAKES, in steel, effect of hydrogen, 66*A*., 67*A*., 115*A*.
FLAMES :
  radiation, 172*A*.
  temperature, 213*A*.
  temperature measurement, 19*A*.
FLOW, material in tube drawing, 92*A*.
FLUIDITY, cast steel, 10*A*., 223*A*.
FLUORSPAR :
  behaviour in slags, 7*A*.
  behaviour in steel melts, 179*A*.
  use for determination of ferrous oxide in slag, 167*A*.

GRAPH-MNS, 157*A*.
GRAPH-MO, 157*A*.
GRAPH-SIL, 157*A*.
GRAPH-TUNG, 157*A*.
GRAPHITE :
distribution in cast iron, 205*A*.
oxidation, in iron analysis, 74*A*.
preparation and properties, 44*A*.
use for ingot moulds, 44*A*.
GRAPHITIC STEEL, properties, 157*A*.
GRAPHITISATION :
cast iron, 86*A*.
cast iron, velocity, 122*A*.
steel, effect of elements, 119*A*.
steel, structural changes, 51*P*.
GREAT LAKES STEEL CORP., strip mills, 57*A*.
GREAVES ETCHELLS ELECTRIC FURNACE, 228*A*.
GREENAWALT SINTERING PLANT, Julienhütte, 43*A*.
GRINDING :
carbide tools, 28*A*.
metals, effect of electrolytes, 150*A*.
rolls, 16*A*.
GUIDES, looping, pattern-making for, 221*A*.
GUN BARRELS :
forging, 14*A*.

GUN BARRELS (*contd.*)—
heat treatment, 147*A*.
heat-treatment furnaces, 23*A*.

HAIR-LINE CRACKS :
in steel, effect of hydrogen, 115*A*.
in steel, effect of hydrogen and stresses, 67*A*.
HARD-FACING, 27*A*.
alloys for, 156*A*.
HARD SURFACING, 143*A*.
HARDENABILITY :
iron-cobalt-tungsten alloy, 110*A*.
shallow-hardening steel, 111*A*., 243*A*.
steel, bibliography, 70*A*.
HARDENABILITY TESTS :
Jominy, 242*A*., 243*A*.
McCleary and Waerfel, 242*A*.
standardisation, 242*A*.
steel, 110*A*.
HARDENING :
cyanide, 145*A*.
flame-, 144*A*., 235*A*.
flame-, chromium-molybdenum cast iron, 60*A*.
flame-, effect on axles, fatigue strength, 151*A*.
flame-, malleable cast iron, 20*A*.
flame-, Shorter process, 21*A*.
induction, 23*A*., 143*A*.
induction, Budd process, 24*A*.
induction, crankshafts, 98*A*.
molybdenum steel, hardening in salt baths, 20*A*.
precipitation, iron-tungsten alloys, 160*A*.
precipitation, steel, 20*A*.
surface, 142*A*.
tool steel, 236*A*.
work-, manganese steel, 25*A*.
work-, steel, 153*P*.
HARDENING FURNACES, 61*A*.
for baths, 23*A*.
salt bath, Hultgren, 23*A*.
HARDNESS :
Brinell, cast iron, spread of results, 111*A*.
chromium-molybdenum high-speed steel, 69*A*.
iron-manganese alloys, 32*A*.
Rockwell, spherical surfaces, measurement, 153*A*.
steel, effect of chromium and molybdenum, 36*A*.
tungsten high-speed steel, 69*A*.
welds, 24*A*., 238*A*.
HARDNESS CRACKS, in high-speed steel, 236*A*.
HARDNESS TESTS, dynamic, metals at high temperatures, 112*A*.
HEADING PRESS, eccentric operated, 139*A*.
HEALTH CONDITIONS, in tar-distillation plants, 46*A*.
HEAT :
flow in arc welding, 148*A*.
specific, electrolytic iron, 200*A*.
specific, iron-carbon alloys, 200*A*.
supply to open-hearth furnaces, 178*A*.
HEAT ETCHING, steel, 118*A*.
HEAT EXCHANGES, welding, 237*A*.
HEAT LOSS, in forging and pressing, 182*A*.
HEAT-RESISTANT MATERIALS, use for combustion engines, 246*A*.
HEAT-RESISTANT STEEL :
action of molten metals, chlorides, sulphides, cyanides and nitrates, 245*A*.
action of sulphur dioxide, 245*A*.
brittleness, 246*A*.
creep, 153*A*.
properties, 66*A*., 245*A*.
HEAT TRANSFER :
in metal bodies, 182*A*.
in solids, 133*A*.
HEAT TREATMENT, 19*A*., 58*A*., 94*A*., 141*A*., 184*A*., 233*A*.
aircraft engines, 184*A*.
cast iron, 94*A*.
die steel, volume changes, 95*A*.
effect on die steel, softening, 113*A*.
effect on steel, impact strength at low temperatures, 63*A*., 109*A*.
effect of time, 141*A*.
gun barrels, 147*A*.
high-speed steel, 96*A*., 141*A*., 185*A*.
magnet alloys in magnetic field, 244*A*.
molybdenum high-speed steel, 60*A*., 61*A*., 185*A*.
ordnance, 229*A*.
shells, 146*A*., 147*A*., 233*A*.
springs, laminated, 19*A*.
stainless steel, 96*A*.
tool steel, 141*A*.
use of electric currents, 23*A*., 98*A*., 143*A*.
use of salt baths, 59*A*., 60*A*., 61*A*., 143*A*.
wire, effect of time, temperature and size, 146*A*.
HEAT-TREATMENT FURNACES, 23*A*., 233*A*.
controlled atmospheres, 58*A*., 96*A*., 143*A*., 185*A*., 186*A*.
for forgings, 146*A*.

HEAT-TREATMENT FURNACES (*contd.*)
for sheets, 233*A*.
for shells and gun barrels, 23*A*.
for steel castings, 45*A*.
for strip, 233*A*.
for tinplate, 233*A*.
for tubes, 233*A*.
for wire, 233*A*.
radiant tube, 144*A*.
rotating hearth, 233*A*.
temperature control, 59*A*.
HEATING :
effect on steel, 237*A*.
induction, shell forgings, 93*A*.
HÉROULT ELECTRIC FURNACE, 138*A*., 224*A*., 228*A*.
HIGH-FREQUENCY FURNACES. *See* Electric Furnaces.
HIGH-SPEED STEEL :
austenite transformation at low temperatures, 122*A*.
chromium-molybdenum, hardness, 69*A*.
chromium-molybdenum, thermal conductivity, 69*A*.
effect of forging, 157*A*.
effect of vanadium, 247*A*.
hardness cracks, 236*A*.
heat treatment, 96*A*., 141*A*., 185*A*.
molybdenum, hardening in salt baths, 20*A*.
molybdenum, heat treatment, 19*A*., 60*A*., 61*A*., 185*A*.
molybdenum, properties, 69*A*., 157*A*., 247*A*.
substitute, 235*A*.
tungsten, development in Russia, 37*A*.
tungsten, hardness, 69*A*.
tungsten, thermal conductivity, 69*A*.
vanadium, tempering, 99*A*.
HISTORY, wire drawing, 231*A*.
HONORARY MEMBERS :
election of H. Brearley, 2*P*.
election of W. S. Tower, 2*P*.
HOT BRITTLENESS, molybdenum steel, 113*A*.
HOT PRESSING, power requirements, 16*A*.
HULTGREN SALT-BATH FURNACE, 23*A*.
HYDROCHLORIC ACID, effect on zinc coatings, 191*A*.
HYDROGEN :
absorption in electric-furnace process, 92*A*.
adsorption by steel, 35*A*.
determination in coal, 78*A*.
effect in cast iron, 68*A*.
effect in enamel coatings, 35*A*.
HYDROGEN (*contd.*)—
effect in steel, 68*A*.
effect in steel, flake formation, 66*A*., 67*A*., 115*A*.
effect in steel, hair-line crack formation, 115*A*.
equilibria in steelmaking, 91*A*.
reduction of iron ore, 134*A*.
HYDROGEN EMBRITTLEMENT, steel, 155*A*.

IHRIGIZING PROCESS, 59*A*.
ILLUMINATION, vertical, for macrographs, 38*A*.
ILSEDE HÜTTE GAS-CLEANING PLANT, 217*A*.
IMPACT STRENGTH :
steel at low temperatures, effect of grain size and heat treatment, 63*A*., 109*A*.
steel castings at low temperatures, 108*A*.
tensile, effect of strain rate, 107*A*.
INCLUSIONS :
classification method, 38*A*.
in iron castings, 222*A*.
spectrum analysis 252*A*.
INDIA, coal deposits, 214*A*.
INDIAN COAL, properties, 214*A*.
INDUCTION HARDENING, 23*A*., 143*A*.
Budd process, 24*A*.
crank shafts, 98*A*.
INDUCTION HEATING, shell forgings, 93*A*.
INGOT MOULDS :
condition, effect on surface quality of billets, 54*A*.
life, 13*A*., 54*A*., 120*A*., 181*A*.
runners, refractory materials for, 132*A*.
use of carbon and graphite, 44*A*.
INGOT STRIPPERS, 55*A*.
INGOT TOPS, refractory materials, 132*A*.
INGOTS, undercooling, 228*A*.
INSULATING BRICKS :
diatomaceous, properties, 3*A*.
uses, 213*A*.
INSULATION, furnaces, 44*A*.
INTERGRANULAR CORROSION :
austenitic steel, 73*A*.
chromium-nickel steel, 40*A*., 73*A*.
steel, 127*A*.
IRON :
determination in oxide and slag, 75*A*.
determination in silicates, 75*A*.
determination, zinc reduction method, 254*A*.

IRON (*contd.*)—
electrodeposition, 31*A*.
liquid, carbon-oxygen equilibrium, 125*A*.
liquid, solubility of iron oxide, 91*A*.
production, 6*A*., 46*A*., 90*A*., 134*A*., 175*A*., 218*A*.
pure, freezing point, 71*A*.
pure, transformations, 118*A*., 159*A*.
tensile tests at high temperatures, 62*A*.
IRON-ALUMINIUM-NICKEL ALLOYS :
heat treatment in magnetic field, 244*A*.
sintered, use for magnets, 219*A*.
transformations, 158*A*.
IRON-CARBON ALLOYS :
martensite transformation, 125*A*.
pure, structure, 39*A*., 121*A*.
specific heat, 200*A*.
thermal expansion, 153*A*.
IRON-CARBON DIAGRAM, as a guide to foundrymen, 89*A*.
IRON-COBALT-NICKEL ALLOYS, expansion coefficient, 34*A*.
IRON-COBALT-TUNGSTEN ALLOYS, hardening characteristics, 110*A*.
IRON INDUSTRIES :
British Empire, 11*A*.
Lincolnshire, 43*P*.
Russian, 84*A*.

determination in coke, 79*A*.
determination in steel, 282*P*.
effect in cast iron, 156*A*.
effect in cutting oils, 150*A*.
effect in steel, graphitisation, 119*A*.
in coal, effect of heat and pressure, 214*A*.
recovery from gas, alkazid process, 45*A*.
recovery from gas, Ferrox process, 45*A*.
recovery from gas, Gesellschaft für Kohlentechnik process, 45*A*.
recovery from gas, Girbotol process, 45*A*.
recovery from gas, Girdler process, 45*A*.
recovery from gas, Katasulf process, 45*A*.
recovery from gas, Seaboard process, 45*A*.
recovery from gas, Thylox process, 45*A*.
SULPHUR DIOXIDE, action on heat-resistant steel, 245*A*.
SULPHURIC ACID, use for pickling steel, 29*A*.
SURFACE FILMS, effect on wear, 200*A*.
SWARF :
briquetting, 88*A*.
reclamation, 48*A*.
SWEDISH IRON ORE, reducibility, 47*A*.
SWELLING, coal, 83*A*., 134*A*.

TALBOT PROCESS, Witkowitz Works, 226*A*.
TANKS :
cathodic protection, 161*A*.
welding, 237*A*.
TANTALUM, determination in steel, 76*A*., 166*A*.
TAR-DISTILLATION PLANTS, health conditions, 46*A*.
TEARING, steel castings, effect of mould friction, 101 *Paper*.
TELLURIUM :
addition to chilled castings, 220*A*.
detection in minerals, 74*A*.
determination by spectrum analysis 77*A*.
TEMPERATURE GRADIENTS :
blast-furnace linings, 1*A*., 212*A*.
coke-oven walls, 174*A*.
TEMPERATURES :
control in heat-treatment furnaces, 59*A*.
control in open-hearth furnace roofs, 318*P*.
distribution in liquid steel, 245 *Paper*.
effect on chromium-nickel steel, deformation resistance, 113*A*.
fusion, coal ash, determination, 78*A*.
high, crushing tests of refractory materials, 1*A*.
high, deformation of metals, 51 *Paper*.
high, hardness tests of metals, 112*A*.
high, properties of cast iron, 156*A*.
high, rupture tests of refractory materials, 1*A*.
high, tensile tests of aluminium, 62*A*.
high, tensile tests of iron, 62*A*.
high, tensile tests of steel, 51*P*., 62*A*.
low, fatigue strength of steel, 199*A*.
low, impact strength of steel, effect of grain size and heat treatment, 63*A*., 109*A*.

TEMPERATURES (*contd.*)—
low, impact strength of steel castings, 108*A*.
low, notched-bar tensile strength of steel, 196*A*.
low, transformation of austenite in high-speed steel, 122*A*.
measurement, apparatus for, 233*A*.
measurement, flames, 19*A*.
measurement, gases, 94*A*.
measurement, liquid steel, 213 *Paper*, 94*A*., 233*A*.
measurement, liquid steel, Schofield-Grace method, 18*A*.
measurement, liquid steel, use of ciné films for training operatives, 179*A*.
pouring, effect on cast iron, 108*A*.
TEMPERING :
spring steel, 236*A*.
tool steel, 24*A*.
vanadium high-speed steel, 99*A*.
TENSILE-FATIGUE TESTING MACHINE, for wire, 241*A*.
TENSILE IMPACT STRENGTH, effect of strain rate, 107*A*.
TENSILE PROPERTIES :
bainite, 108*A*.
pearlite, 108*A*.
spheroidite, 108*A*.
TENSILE STRENGTH :
deformed metals, 197*A*.
effect of cold-work, 194*P*.
iron-manganese alloys, 32*A*.
notched-bar, aircraft steel, 196*A*.
TENSILE TESTS :
alloy steel, 240*A*.
cast iron, specimen holder, 107*A*.
measurement of elongation, 241*A*.
metals at high temperatures, 62*A*.
steel at high temperatures, 51*P*.
wire, 196*A*.
TESTING MACHINES, tensile-fatigue, for wire, 241*A*.
TESTS :
cast iron, standardisation, 107*A*.
coke, British standard, 216*A*.
compression, alloy steel, 240*A*.
corrosion, paint coatings, 127*A*.
crankshafts, 117*A*.
creep, stepped loading, 66*A*.
crushing, refractory materials at high temperatures, 1*A*.
deep-drawing, steel, 92*A*.
fatigue, interpretation of results, 65*A*.
hardenability, Jominy, 242*A*., 243*A*.
hardenability, standardisation, 242*A*.
TESTS (*contd.*)—
hardenability, steel, 110*A*.
hardenability, Wuerfel, 242*A*.
hardness, dynamic, metals at high temperatures, 112*A*.
magnetic, 33*A*., 70*A*., 109*A*.
moulding sand, 48*A*.
porosity, 249*A*.
rupture, refractory materials at high temperatures, 1*A*.
spark, 249*A*.
tensile, alloy steel, 240*A*.
tensile, cast iron, specimen holder, 107*A*.
tensile, measurement of elongation, 241*A*.
tensile, metals at high temperatures, 62*A*.
tensile, steel at high temperatures, 51*P*.
tensile, wire, 196*A*.
twisting, wire, 240*A*.
vibration, 152*A*.
THERMAL CONDUCTIVITY :
chromium-molybdenum high-speed steel, 69*A*.
tungsten high-speed steel, 69*A*.
THERMAL EXPANSION :
carbonyl iron, 153*A*.
electrolytic iron, 153*A*.
iron-carbon alloys, 153*A*.
non-ferrous metals, 153*A*.
THERMOCOUPLES, quick-immersion, use for temperature measurement of liquid steel, 213*P*.
THERMODYNAMICS, laws, 44*A*.
THOMAS, RICHARD & CO., LTD., open-hearth furnaces, 138*A*.
THYLOX PROCESS for sulphur recovery from gas, 45*A*.
TIME STUDY, forge shops, 230*A*.
TIN :
determination in iron and steel, 76*A*.
effect in steel, graphitisation, 119*A*.
electrodeposition, 32*A*., 104*A*., 192*A*.
electrodeposition in alkaline baths, 192*A*.
recovery from tinplating baths, 192*A*.
TIN COATINGS, 190*A*.
TIN FORMS, use in moulds, 137*A*.
TINPLATE :
heat-treatment furnaces, 233*A*.
rate of formation of tin-iron alloy, 104*A*.
TIN-PLATING BATHS, recovery of tin, 192*A*.

TITANIFEROUS IRON ORE, extraction of vanadium, 169*A*.
TITANIUM :
detection in minerals, 74*A*.
diffusion in steel, effect of carbon, 234*A*.
effect in chromium steel, 36*A*.
use in steel manufacture, 90*A*.
TITANIUM CARBIDE, in titanium steel, 129*P*.
TITANIUM NITRIDE, in titanium steel, 129*P*.
TITANIUM STEEL, carbide and nitride particles, 129 *Paper*.
TOOL STEEL :
decarburisation, 145*A*.
forging, 16*A*.
hardening, 236*A*.
heat treatment, 141*A*.
heating in oxidising atmospheres, effect on carbon content of surface, 97*A*.
tempering, 24*A*.
welding, 25*A*.
TORPEDO BODIES, forging, 139*A*.
TORSIONAL FATIGUE STRENGTH, crankshafts, 117*A*.
TRACTOR PARTS, induction hardening, 143*A*.
TRANSFORMATIONS :
austenite, determination by electrical-resistance method, 122*A*.
austenite in high-speed steel at low temperatures, 122*A*.
chromium-nickel steel, 159*A*.
chromium - silicon - tungsten - vanadium steel, 206*A*.
chromium-silicon-vanadium steel, 206*A*.
